EXPERIENCE

Lead Data Scientist — Energy

Centerpoint Energy

Apr 2026 – Present Houston, TX

- lead a new geospatial intelligence (GEOINT) team, setting technical direction and architecture standards for satellite-, LiDAR-, and imagery-driven systems
- architected and deployed cloud-native, containerized services (Cloud Run, Docker, CI/CD, BigQuery) that ingest and process large-scale geospatial and remote-sensing data through scalable, reliable pipelines
- built a GPU-accelerated 3D computer-vision pipeline that maps infrastructure by aligning engineering CAD models to LiDAR point clouds
- prototyped and deployed a multi-model generative-AI application integrating managed foundation-model services (Vertex AI, Cohere) with a retrieval benchmark for document Q&A and image analysis

Senior Data Scientist — Climate Tech

SeekOps Inc.

Mar 2022 – Apr 2026 Austin, TX

- designed, deployed, and delivered customer-facing cloud analytics platforms (Plotly Dash on Azure) that turned complex satellite- and drone-based sensing capabilities into productized solutions, directly securing contracts of $50–150k
- served as customer-facing technical lead across 10+ countries, presenting solutions, architecture, and technical strategy to executives, enterprise customers, and international conference audiences
- executed proofs of concept and authored technical documentation and uncertainty assessments supporting multi-year enterprise contracts

Data Scientist — Ag Tech

Bayer CropScience

Feb 2020 – Mar 2022 St. Louis, MO

- built end-to-end cloud data workflows on AWS (S3) combining relational databases, geospatial data, and aerial imagery into analytics-ready datasets
- applied machine learning and computer vision (Detectron2) to UAV- and aircraft-derived imagery for large-scale digital phenotyping
- delivered interactive decision-support applications to internal stakeholders and business teams

Postdoctoral Fellow — Aerospace & Remote Sensing

NASA Langley Research Center

Oct 2017 – Feb 2020 Hampton, VA

- developed retrieval algorithms for satellite and airborne remote-sensing instruments (High Spectral Resolution Lidar) supporting NASA Earth-observation and atmospheric science missions
- delivered peer-reviewed results and instrument data tooling for the aerospace remote-sensing research community

SELECTED PROJECT

NASA HSRL Data Toolkit (hsrltool)

Open-source scientific software

A graphical toolkit for reading, inspecting, and visualizing NASA High Spectral Resolution Lidar (HSRL) instrument data (HDF5), used by the atmospheric remote-sensing community.

EDUCATION

EXECUTIVE SUMMARY

PhD scientist and technical leader with 8+ years architecting, building, and delivering cloud-based data, ML, and remote-sensing systems across AWS, Azure, and GCP — paired with deep aerospace and satellite remote-sensing domain expertise from NASA. Skilled at translating complex technical capabilities into customer-facing cloud solutions: designing production platforms, executing proofs of concept, securing and delivering enterprise contracts, and presenting architecture and business value to executives, customers, and partners worldwide.

CORE COMPETENCIES

Cloud Solution Architecture
Customer-Facing Solution Delivery
Proofs of Concept
Technical Strategy & Enablement
Reference Architecture & Documentation
Technical Leadership
Cross-Functional Collaboration
Executive & Partner Communication
Mentoring & Training

DOMAIN EXPERTISE

Satellite & Airborne Remote Sensing
Aerospace / Earth Observation
LiDAR & Point Clouds
Geospatial Analytics
Cloud & Distributed Computing
Systems & Data Integration
Machine Learning
Computer Vision
Generative AI & Foundation Models
Data & Analytics

TOOLS & TECHNOLOGIES

AWS
AWS S3
Azure
GCP
Cloud Run
BigQuery
Vertex AI
Docker
CI/CD
Python
PyTorch
SQL
GPU / CUDA
GDAL
QGIS
Git
Plotly
Linux

AWARDS

NASA Postdoctoral Program Fellow

NASA Langley Research Center

Oct 2018 Hampton, VA
